

Microbiology Laboratory Technician

If you enjoy learning about and working on microorganisms and if you would like to work in a dynamic laboratory, please consider working at AEMTEK.

AEMTEK is a high quality, accredited laboratory that provides testing, research, training, and consulting services for the food, environmental, water, and nutraceutical industries. We strive to help clients obtain accurate, fast and reliable analytical data and provide solutions to ensure food safety, water quality and environmental health. The company is in south Fremont, with easy access to highway 880, 680 and CA 237. For more information, please visit www.aemtek.com.

AEMTEK is looking for microbiology laboratory technicians to help the company grow and respond to clients' analytical needs. Both full time and part time positions are available. Laboratory technicians are responsible for carrying out sample preparation and microbiology and chemistry testing on daily basis, performing and coordinating quality control work, maintaining the laboratory, assisting in special projects, sanitizing and organizing lab space, and performing other duties as assigned.

Qualifications desired:

- Associate or B.S. degree in biology, chemistry or other science field.
- Prior laboratory work experience is a plus
- Good school and employment records
- Good organization and people skills
- Attention to details, fast learner, cooperative, dependable
- Disciplined to follow instructions and standard operating procedures
- Can commit to work late shift and weekends
- Able to lift or move sample boxes and lab supplies up to 50 lb.

To apply:

Please send your resume and cover letter to lab@aemtek.com with the subject: *Application for Laboratory Technician Position.*
